Present Employer & Title: Department of Veteran Affairs; Program Support Specialist

A comprehensive leadership program designed to develop community leaders, promote networking, teach leadership styles, explore local issues, enhance critical thinking and further economic development.

Since its formation in 1996, Vision Henderson County has become one of the most prestigious programs in Henderson County. Each year, a select group of local leaders learn about what is going on in our business community and how they can make a difference. The program builds community leadership through an in-depth view of the cultural, economic, historic, social, educational, environmental and government assets in Henderson County and connects participants with prominent civic, business and government leaders. The result is that hundreds of alumni have made countless contributions to the community and its quality of life.

The Vision Henderson County leadership program is designed to:

- Develop a leadership pool of informed, involved and committed citizens
- Enhance communication and interaction among participants to form a network for cooperative community trusteeship
- Experience and understand the diversity of leadership decision-making styles and processes
- Explore issues facing Henderson County, to gain insight on how to formulate solutions and to encourage the team approach to solving community problems and visioning the future
